## **DETAILED ACTION**

This is in response to an request for reconsideration filed on April 16<sup>th</sup>, 2004

### ***Response to Arguments***

1. Applicant's arguments with respect to claims 1-66 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-66 rejected under 35 U.S.C. 102(e) as being anticipated by Maytal et al (U.S. Patent No 6,715,079).
4. As per claim 1, Halstead et al teach a method of providing an initial good to a computer wherein the initial digital good include a plurality of selectively arranged parts in an initial configuration and the initial digital good is configured as to not properly function with the

Art Unit: 3621

computer receiving unique key data converting the initial good into a modified digital good using unique key data to selectively individualize the initial digital with at least one computer such that the plurality of selectively arrange parts in the modified digital good have been rearrange to have a substantially unique operative configuration tat properly functions with the computer and is different that the initial configuration and causing the at least one computer to run the modified digital good (*see columns 5 lines 56-6 line 5, 10 lines 16-52*).

5. As per claims 2-66, they disclose the same inventive concept as claim 1. Therefore, they are rejected under the same rationale.
